TCI CASAMBI DRIVERS ARE EQUIPPED WITH THE LAST GENERATION OF IC CBM003

CBM-003B/C is a Class 2 embedded Bluetooth module designed for integration into LED drivers, different lighting control applications, light fixtures, and LED bulbs. It comes pre-installed with Casambi proprietary firmware, making it fully compatible with other Casambi-enabled devices.

CBM002:
- Up to 4 dBm output power and -93 dBm RX sensitivity
- Range up to 50 m in open air
- Supports Bluetooth 4.0

NEW

CBM003:
- Up to +7 dBm output power and - 95 dBm RX sensitivity (Longer range capabilities)
- 103 dBm RX sensitivity in long-range mode
- Range up to 400 m in line-of-sight
- Supports Bluetooth 5.0

CASAMBI

PRO FLAT CASAMBI 20 NFC

- Power up to 20 W
- Operating voltage range: 10...54 V
- Current range: 150...500 mA
- NFC compliant with Zhaga Book 24
- Rated voltage: 220 ÷ 240 VAC
- SELV

CASAMBI

Casambi is an ecosystem and application designed for wireless lighting control.
Casambi is based on Bluetooth Low Energy (BLE) technology that is a type of Bluetooth technology that operates with minimal energy consumption and a low data capacity compared, by Bluetooth classic. The simplest Casambi setup consists of a Casambi luminaire and a Casambi switch, or mobile phone with the Casambi application downloaded. The app is available for free for both iOs and Android devices.

WISILICA

The WiSilica platform works with both legacy devices and new products designed for the IoT, and sets new benchmarks for IoT success in areas including real-time presence and awareness, secure connectivity, data analytics opportunities, cost savings, and higher-quality user experiences.

The platform makes it easy to bring together infrastructure, sensors, devices and people into a single unified, smart environment based on a Wi-Fi and Bluetooth low-energy (BLE)-based mesh-networking platform.

PHILIPS

Philips MasterConnect is an innovative way to enable lighting components to work seamlessly together to deliver all the amazing benefits of lighting automation. It guarantees the reliable interoperability of luminaires, drivers, sensors, switches, and even gateways.

That's because the entire solution is built around Bluetooth Low Energy (BLE) and Zigbee protocols.

So, it also offers the flexibility to upgrade, enhance and expand your connected lighting at any time in the future.

Matter is an open-source connectivity based on Bluetooth for data commissioning process and Wi-Fi or Thread for physical transmission.

Matter guarantees standard for smart home and IoT (Internet of Things) devices, improving the interoperability and compatibility between different manufacturer and security, and always allowing local control as an option. By adhering to the IoT smart home standard Matter, manufacturers can ensure that their products are accessible to a wider range of consumers and can be easily integrated into existing smart home ecosystems. This can lead to a more streamlined and convenient smart home experience for consumers, as well as more innovation and competition in the smart home industry.

MILANOinTRACK
40/300-1050 MINI DALI

- Power up to 40 W
- Current range: 300...1050 mA
- Rated voltage: 220 ÷ 240 VAC
- Short housing
- Available with different colours: white, black, grey

LV HR TRACK CASAMBI OF

- Power up to 38 W
- Current range: 150...1050 mA
- Rated voltage: 48 VDC
- WIRELESS DIMMABLE
- Light regulation 0/1 - 100%
- SELV (Class III)
- Suitable for Stucchi track
  - 9500…/ST1
  - 9500…/ST2
  - 9500…/BST3

DALI 0-10 OPTO ISOLATOR INTERFACE

• Rated voltage: 48 VDC
• SELV (Class III)
• DALI - 0-10V interface for 48 V track system
• Two 0-10V input channel
• Suitable for DT6 and DT8 system

LV HR TRACK DALI NFC

The device is a signal repeater compatible with DALI protocol, it includes an integrated power supply for the output line.
It's used to extend or/and to electrically isolate the digital input line from the output line.
Thanks to the integrated power supply, there is no need of a power supply for the output DALI compatible line.
