

SUBJECT: New European Union (EU) Regulation on Chemicals (REACH)

Dear Customer,

we inform you that all LED modules that we supply you are classified as articles by the REACH regulation (EC Regulation No.1907/2006), and they don't release substances intentionally.

To produce them we use standard widely used electronic components, classified by the REACH regulation as articles too.

REACH Regulation ask suppliers to pass all the available information to their customers. TCI does not use in its production departments any of the substances in REACH candidate list and we are asking our suppliers if one or more of them is present in percentage greater than 0,1%, the data collection is a continuous process and we will inform you immediately if we find one or more of these substances in percentage greater than 0,1% w/w, in agreement with REACH regulation.

At the best of our actual knowledge in the articles supplied there are no REACH SVHC substances present in percentage greater than 0,1% w/w.

The Candidate List was last extended on June 25, 2025 and now it contains 250 substances. <http://www.echa.europa.eu/web/guest/candidate-list-table>

Please don't hesitate to contact us for any further information you may require.

Saronno, 2025/09/05

Best regards,

TCI
