

PFAS Compliance Statement

Perfluoroalkyl substances (PFAS) are a large family of thousands of synthetic chemicals whose widespread use has led to their presence in the environment. These substances all contain carbon-fluorine bonds, among the strongest in organic chemistry, making them resistant to degradation both during use and in the environment. Most PFAS are also readily transported, spreading far from their source.

TCI Telecomunicazioni Italia S.r.l. doesn't intentionally add fluorinated substances to the listed parts because it would not add to the functionality or performance of products.

Product compliance is based upon information provided by suppliers of the raw materials used by TCI Telecomunicazioni Italia S.r.l to manufacture these products. As such, TCI Telecomunicazioni Italia S.r.l makes no independent representations or warranty, expressed or implied, and assumes no liability in connection with the use of this information.

Based on the information gathered from our supply chain of components and raw materials we can declare that only in TCI code 124800CC SIRIO 2X500W 1.2A DALI NFC CC and 124801CC SIRIO 2X500W 1.2A DALI NFC DMX CC our LED drivers there may be traces of Perfluoroisobutyl methyl ether NCAS 163702-08-7. All other TCI power supplies are PFAS-free.

TCI Telecomunicazioni Italia S.r.l will continue to monitor all the changes to the legislation and update this declaration to reflect those changes.
