

**SUBJECT: New European Union (EU) Regulation on Chemicals (REACH)**

Dear Customer,

Dear Customer, we inform you that all LED modules that we supply you are classified as articles by the REACH regulation (EC Regulation No.1907/2006), and they don't release substances intentionally.

To produce them we use standard widely used electronic components, classified by the REACH regulation as articles too.

The content of this document is based on TCI Telecomunicazioni Italia SRL understanding of the directives and information on materials provided by third parties. TCI Telecomunicazioni Italia SRL makes no warranty as to the accuracy or completeness of such information.

TCI Telecomunicazioni Italia SRL has taken and continues to take commercially reasonable steps to provide accurate information but may not have conducted chemical analysis on incoming materials. This declaration is based on the findings of an inquiry conducted across TCI's entire supply chain.

We hereby confirm that TCI's production process does not utilize any substances included in the current ECHA SVHC candidate list.

At the best of our actual knowledge in the articles supplied there are no REACH SVHC substances present in percentage greater than 0,1% w/w.

The Candidate List was last extended on February 04, 2026, and now it contains 253 SVHC substances.
