

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) declaration.

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) entered into force on 12 August 2026, with the objective of reducing the environmental impact of packaging by establishing requirements applicable to its entire life cycle, including design, production, and waste management.

Under the PPWR (Packaging and Packaging Waste Regulation), the European Commission defines a "manufacturer" as any natural or legal person who not only physically produces the packaging but also plays a role in its design or manufacture, or who places their own brand name or trademark on the packaging itself.

According to statements by the Commission, the use of packaging bearing exclusively the mark of the customer or supplier and not that of the associated company would identify the party whose mark is applied as the "manufacturer." As noted, it is presumed that this party "holds decision-making power in the contractual relationship with its suppliers" and is therefore able to determine the characteristics of the packaging.

TCI Telecomunicazioni Italia Srl does not place its brand on the packaging; we therefore qualify as a distributor. As provided under the regulation, distributors are not required to draw up technical documentation. However, they must exercise due diligence to verify proper labeling and ensure that the manufacturer is registered with the relevant national Extended Producer Responsibility schemes.

TCI Telecomunicazioni Italia Srl recognizes and complies with all applicable requirements of the Regulation. Based on the information provided by our suppliers, to the best of our knowledge, the packaging used for our products is manufactured in full accordance with all relevant PPWR requirements.

This Conformity Declaration applies exclusively to the packaging of products supplied by TCI Telecomunicazioni Italia Srl.
